

**PRODUCT NAME :** Wired Control Robot  
Arm Kit with USB Interface

**PRICE :** Rs 7,900.00

**SKU :** RM1169

## DESCRIPTION

The robotic arm is a type of mechanical arm, usually programmable, with similar functions to a human arm; the arm may be the sum total of the mechanism or may be part of a more complex robot. The links of such a manipulator are connected by joints allowing either rotational motion (such as in an articulated robot) or translational (linear) displacement. The links of the manipulator can be considered to form a kinematic chain. The terminus of the kinematic chain of the manipulator is called the end effectors and it is analogous to the human hand.

## Features of Wired Control Robot Arm Kit With USB Interface:

- Wrist motion of 120 degrees.
- An extensive elbow range of 300 degrees.
- Base rotation of 270 degrees.
- Base motion of 180 degrees.
- Vertical reach of 15 inches.
- Horizontal reach of 12.6 inches.
- Lifting capacity of 100g.

## Applications of Wired Control Robot Arm Kit With USB Interface:

- It is used in wired robotics.
