

PRODUCT NAME : 2.4 GHz RF Wireless
Robotic Development Kit

PRICE : Rs 4,999.00

SKU : RM1280

DESCRIPTION

This is a 2.4GHz RF Robotic car designed using CC2500 SERIES IC. It has a joystick remote control and a robotic car on which the RF receiver is attached to control the Robot through the transmitter.

Features of 2.4 GHz RF Wireless Robotic Development Kit:

- Ease to use.
- Ease of assembling.
- Working frequency: 204 Ghz.
- Long range: Up to several KM.

Applications of 2.4 GHz RF Wireless Robotic Development Kit:

- It is used in amplifying & switching purposes.
- It is used in Robotics projects.
- It is used in DIY projects.

Kit Contents of 2.4 GHz RF Wireless Robotic Development Kit:

- 4 X Central Shaft Metal gear Motor
- 4 X 4" Wheels
- 1 X Jumbo Chassis
- 4 X Supporting Studs
- 1 X Nut/Bolt pack
- 2.4GHz Transmitter + 2.4Ghz Receiver/motor driver board
