

PRODUCT NAME : Raspberry Pi Robot Kit

PRICE : Rs 4,500.00

SKU : RM1351

DESCRIPTION

This Robot Kit is designed to give essential equipment to build a **Free Raspberry Pi with robot Kit**. We are providing this robot with raspberry pi model b+. The software engineers can begin constructing a Camera empowered Robot, which can be controlled through WiFi system. The robot can be controlled through a program from a PC or an advanced cell associated with WiFi system. This pack utilizes pre-amassed RTK Motor Controller board, which is introduced on top of the Raspberry Pi GPIO Pins. The DC Motors can be worked utilizing Python, Scratch or some other technique for controlling GPIO pins. The engines and [Raspberry Pi](#) are controlled utilizing Power Bank, which has 2 USB outputs and equipped for conveying up to 1.6 Amp of current.

Contents of Basic Kit:

- [Metal Gear Central Shaft DC Motors x2](#)
- [6 MM Shaft Wheel](#) x2
- ROBOMART Raspberry Pi Motor Controller Board
- [Castor Wheel](#)
- [Raspberry Pi A+](#)
- Metal Chassis
- HDMI to HDMI Cable
