

**PRODUCT NAME :** CD4511 BCD to 7-segment Latch Decoder Driver

**PRICE :** Rs 39.00

**SKU :** RM1689

## DESCRIPTION

THIS IS A PRODUCT MAY BE DIFFERENT FROM IMAGE SHOWN. Copyrights by Robomart.com

The CD4511 IC types are BCD to 7-segment latch decoder driver constructed with CMOS logic and NPN transistors output devices on a single monolithic package.

## Features of CD4511 BCD To 7-Segment Latch Decoder Driver:

- Input latches for BCD code storage.
- Lamp test and blanking test capability.

## Applications of CD4511 BCD To 7-Segment Latch Decoder Driver:

- Driving common cathode display.
- Multiplexing with common cathode LED display.
- Driving incandescent display.
- Driving low voltage florescent display.
