

**PRODUCT NAME :** WS2812 RGB LED Break  
out module for Arduino

**PRICE :** Rs 299.00

**SKU :** RM2205

## DESCRIPTION

This is a breakout board for the built in WS2812 RGB LED. The WS2812 is actually an RGB LED with a WS2811 built right into the LED! All the necessary pins are broken out to 0.1" spaced headers for easy bread-boarding. Several of these breakouts can be chained together to form a display or an addressable string.
