

PRODUCT NAME : Tilt Sensor Module with breakout

PRICE : Rs 110.00

SKU : RM2217

DESCRIPTION

Tilt Sensor Module Tilt Switch Angle sensor Module Ball Switch Dumping Sensor

Application:

Tilt variety of products, dumping trigger an alarm, dumping off the sensor, tilt sensor. Tire Pressure Monitoring System (TPMS), bicycle lights, digital photo frame rotation, screen rotation, flip video camera, anti-theft system.

Module Features:

using the highly sensitive switch SW-520D as the Tilt Sensor Module Tilt Switch Angle sensor Module Ball Switch Dumping Sensor

Application:

Tilt variety of products, dumping trigger an alarm, dumping off the sensor, tilt sensor. Tire Pressure Monitoring System (TPMS), bicycle lights, digital photo frame rotation, screen rotation, flip video camera, anti-theft system

Module Features:

- using the highly sensitive switch SW-520D as the angle sensor.
- Comparator output signal clean waveform is good, driving ability, than 15mA.
- Working voltage 3.3V-5V
- Output format: Digital switching output (0 and 1)
- With bolt holes for easy installation
- Small plate PCB size: 3.2cm x 1.4cm
- Using a wide voltage LM393 comparator
