

PRODUCT NAME : Text to Speech chip
for SpeakJet - TTS256

PRICE : Rs 1,999.00

SKU : RM2303

DESCRIPTION

The TTS256 is an 8-bit microprocessor programmed with letter-to-sound rules. This built-in algorithm allows for the automatic real-time translation of English ASCII characters into allophone addresses compatible with the Magnevation SpeakJet Speech Synthesizer IC. Combine this with the SpeakJet to build a complete text-to-speech solution.

Features:

- Narrow 28-pin DIP
- Companion chip to Magnevation SpeakJet and Savage Innovations SpeakGin
- Built in 600 Rule database
- 9600bps (8-N-1) serial interface (non-inverted TTL level)
- Generates speech codes from ASCII text
- Compatible with Arduino, Basic Stamp, OOPic, Pic, and any processor with serial output

Frequently Asked Question for Text to Speech chip for SpeakJet - TTS256

Q: What is the price for Text to Speech chip for SpeakJet -TTS256

A: Approx INR 1999 only

Q: Where to buy Text to Speech chip for SpeakJet -TTS256

A: Robomart.com
