

PRODUCT NAME : Compact Optical Dust
Sensor module For Arduino/Rasp
berry-Pi/Robotics

PRICE : Rs 999.00
SKU : RM2306

DESCRIPTION

This is a dust sensor by optical sensing system. An infrared emitting diode (IRED) and an phototran-sistor are diagonally arranged into this device. It detects the reflected light of dust in air. Especially, it is effective to detect very fine particle like the cigarette smoke. In addition it can distinguish smoke from house dust by pulse pattern of output voltage.

Features:

- Compact, thin package (46.0 x30.0x17.6 mm)
- Enable to distinguish smoke from house dust
- Lead-free and RoHS directive compliant

Frequently Asked Question for Compact Optical Dust Sensor module For Arduino/Raspberry-Pi/Robotics

Q: What is the price for Compact Optical Dust Sensor module For Arduino/Raspberry-Pi/Robotics

A: Approx INR 999only

Q: Where to buy Compact Optical Dust Sensor module For Arduino/Raspberry-Pi/Robotics

A: Robomart.com
