

PRODUCT NAME : WIFI IoT Node development board for Arduino

PRICE : Rs 2,999.00

SKU : RM2519

DESCRIPTION

It is a WIFI IoT Node development board, which integrates WG1300 WIFI solution. The Wido's microcontroller is ATMEL ATmega32U4 and is maker friendly. Fully compatible with Arduino and periphery modules. This is a credit card sized controller that comes with everything you need to connect to the cloud.

Specifications:

- 1-Power supply range: 5V or 7-12V
- 2-Arduino Leonardo compatible
- 3-Integrated with WG1300 WIFI chip
- 4-Supports 2.4GHz IEEE 802.11 b/g network
- 5-WiFi and MicroSD driven by SPI port
- 6-User friendly Reset button
