

**PRODUCT NAME :** Raspberry Pi Compatible USB Gamepad

**PRICE :** Rs 799.00

**SKU :** RM3058

## DESCRIPTION

In between bouts of hacking and tinkering every Raspberry Pi programmer needs some rest and recreation! What better way to relax and unwind, than loading up your favourite 90's retro game and blasting some aliens pew pew!

These Raspberry Pi gamepads not only look the bee's knee's, but they have a comfortable rubber edging, have excellent tactile #clicky# feedback and work with all the emulators we could get our hands on! It's wired USB with a 1.4m cable, and it's plug and play with .

Button-wire, it features all the usual suspects - A,B,X,Y,R1,R2,R3,L1,L2,L3, START, SELECT, and D-PAD. It's also got additional analogue joysticks which are mapped to the D-PAD; you turn them on and off with the big shiny red button in the middle. Honestly, what more do you need from a gamepad?
