

PRODUCT NAME : USB Extention Ethernet
et Booster

PRICE : Rs 199.00

SKU : RM3070

DESCRIPTION

Need to send your Raspberry Pi USB signals over a long distance? You need one of these USB over Ethernet Booster sets! This USB booster allows you to connect a USB device to your Pi at a distance of up to 45 metres via the use of a Cat5e (or greater) RJ45 Ethernet Patch cable.

The kit consists of two USB to RJ45 extension adaptors, one male one female, and it's bus powered, so requires no external power! Works best on longer distances with the Raspberry Pi Model B+, but fully compatible with the Model A & Model B Raspberry Pi.
