**SKU** : RM3184

## DESCRIPTION

Unlock your inner Mozart with Piano HAT, the ultimate mini musical companion for your Raspberry Pi!

Piano HAT is inspired by Zachary Igielman's PiPiano and made with his blessing. We've taken his fabulous idea for a dinky piano add-on for the Raspberry Pi and made it touch-sensitive!

Use it to play music in Python, control software synths on your Pi, take control of hardware synthesizers, or surprise us with your creativity!

Piano HAT is compatible with Raspberry Pi 2, B+ and A+ and comes fully assembled, with a trove of examples to get you started.
