

PRODUCT NAME : Clear Enclosure for
Arduino - Electronics enclosure
- 1.0

PRICE : Rs 1,799.00

SKU : RM3224

DESCRIPTION

We are very excited to have one of the first (and we think the best) Enclosure for Arduino & project box now available in clear plastic, the future! Here are all the details:

- Dimensions: 3.6" x 5" x 1.35"
- Injection molded clear plastic
- Enclosure is easy to machine, drill, cut and shape to what you need
- Brass screw inserts (can be used and reused many times, very durable!)
- Fits standard [Arduinos](#) and [16 x 2 LCDs](#)
- Fits Arduino with [Adafruit Protoshield](#) on top with .45" clearance
- Pop out plates for GPS, buttons, sensors, switches, knobs, etc!
- Holds up to 4 AAA batteries internally using [2xAAA holders](#). AA's can squeeze in but the case wont close nicely so we suggest AAA's
- Comes with screws for the LCD, Arduino and case
- Made in Canada!

Comes with all parts shown.
