

PRODUCT NAME : USB 2.0 and Ethernet
Hub - 3 USB Ports and 1 Ethernet

PRICE : Rs 1,999.00

SKU : RM3255

DESCRIPTION

One can never have enough socks, or USB ports. Add some more USB and Ethernet capability to your Raspberry Pi or, really, any kind of computer with this **USB 2.0 and Ethernet Hub!**

This handy combo-hub has 3 USB 2.0 ports, and a AX88772A Ethernet transceiver. This chipset is really common and can be used by any Linux, Mac or Windows computer. It's particularly handy for the [Raspberry Pi A+](#) or brand new [Raspberry Pi Zero](#) which is tight on USB ports and has no Ethernet out. We did some basic tests and got 11+ MB/s transfer speeds on our Pi Zero. Note that Ethernet draws a lot of power and you'll be looking at 280mA current draw when the hub is plugged in, even if the Ethernet itself isn't being used.
