

**PRODUCT NAME :** Pimoroni Black HAT Hack3r Mini Kit

**PRICE :** Rs 1,999.00

**SKU :** RM3296

## DESCRIPTION

A nifty little breakout from our friends at [Pimoroni](#) that lets you access all of the GPIO pins while also running a [HAT](#) on your Raspberry Pi Model Pi 2, A+, or B+. The **Pimoroni Black HAT Hack3r** is ideal for debugging your HAT projects or combining a HAT with other circuits.

Features:

- HAT spec landing area with PCB standoffs
- Includes 40 pin GPIO ribbon cable
- All GPIO pins labelled with function, BCM pin number, physical pin number
- Rubber non-slip feet
- 4 mounting holes
- **Comes un-assembled in kit form**

The inspiration for the Black HAT Hack3r comes from the Pimoroni people debugging new HAT designs but finding it so useful that they turned it into a product!

Kit includes:

- Black HAT Hack3r PCB
- 40-way black GPIO ribbon cable
- 3x 40-way pin header
- 4x PCB standoff for HAT mounting
- 4x Rubber non-slip feet

**Please Note: Raspberry Pi and Adafruit GPS HAT not included.**
