

PRODUCT NAME : DC Motor for Arduino
/Raspberry-Pi/Robotics

PRICE : Rs 70.00

SKU : RM0432

DESCRIPTION

The DC motor is an electrical device which converts from dc electrical energy into mechanical energy.

Features of DC Motor:

- Low cost for control achieved.
- Low torque at startup and high speeds.
- Rugged design.
- Simplicity of construction.
- Can operate in an open loop control system.
- Low maintenance.
- Less likely to stall or slip.
- Will work in any environment.

Applications of DC Motor:

- DIY projects.
- Robotics projects.
- Arduino projects.
- Raspberry-Pi projects.
- Electrical/Electronic projects.
