

PRODUCT NAME : 10 kilo ohm Resistance Array/Network

PRICE : Rs 19.00

SKU : RM0462

DESCRIPTION

The **resistor array** is a passive nine-terminal electrical component that serves as eight 10K ohms resistances and one common ground.

Features of 10 Kilo Ohm Resistance Array/Network:

- Resistance: 10k.
- Wattage: ¼ watt.
- Ease of embedding.

Applications of 10 Kilo Ohm Resistance Array/Network:

- DIY projects.
- Arduino projects.
- Raspberry-Pi projects.
- Electrical/Electronic projects.
