Double-sided tape is any pressure sensitive tape that is coated with adhesive on both sides. It is designed to stick two surfaces together, often in a way which is not visible in the end product, due to it being in between the objects rather than overlaying them.

Features of Double Side Tape:

- Material: PU Foam.
- Thickness: 2mm thick.
- Clean Removal.
- Strong adhesive.

Applications of Double Side Tape:

- Suitable use for plastic, textile, paper, PVC, foam (Sponge), printing finishing, sign making, fabric, card board, nameplate, interior decorative and so forth.
- Not suitable use for both of solid and hard surfaces, as double-sided rubber tape is recommended to be used.
- High initial tack, provide persistent performance and excellent wetting (grabbing) power to various soft and flexible materials.
- Excellent performance of temperature 100 C (212 F).
- Endurance in the condition of hot and cold and/or sudden change of the temperature.
