

**PRODUCT NAME :** Web Cam for Arduino/  
Raspberry-Pi/Robotics

**PRICE :** Rs 700.00

**SKU :** RM0533

NOTE: THE PRODUCT MAY BE DIFFER FROM IMAGE SHOWN ABOVE. Copyrights by Robomart.com

## DESCRIPTION

This is a video camera that feeds its image in real time to a computer or computer network. Unlike an IP camera (which uses a direct connection using Ethernet or Wi-Fi), this webcam is generally connected by a USB cable, FireWire cable, or similar cable. The Webcam contains in-built microphone which makes it a perfect device for video conferencing and calling. The web cam also comes with flash LEDs that are light sensitive. The brightness of the LEDs depends on the intensity of light around it. So, this property makes it flexible enough for using it in night also.

## Features of Web Cam:

- Video Features: Excellent quality, True plug and play, Easy USB interface.
- Connectivity: USB 2.0.
- Focus Range: 4 to infinity.
- Microphone: In built.
- Frame Rate: 30 fps.
- Image Pixel: 8 Mega Pixels.

## Applications of Web Cam:

- DIY projects requiring Video Capture.
- As a Video capture device in Security System.
