DESCRIPTION

It is a customized **power supply board** of Robosapiens India specially designed by keeping in mind of all electronic gadgets in the RoboMart. In this voltage from **5V to 24V** can be achieved. A capacitor is used to remove the ripple factors. A voltage regulator is placed to maintain a constant voltage level of **5V**.

Features of Power Supply Project Board:

- Output Voltage: **5V-24V**
- Power Output: **500mA**

Application of Power Supply Project Board:

- Secondary cell for **Robotics applications**.
- Rechargeable power banks for device testing.
