

PRODUCT NAME : ATMEGA 8 Project Board without Controller V 2.0

PRICE : Rs 130.00

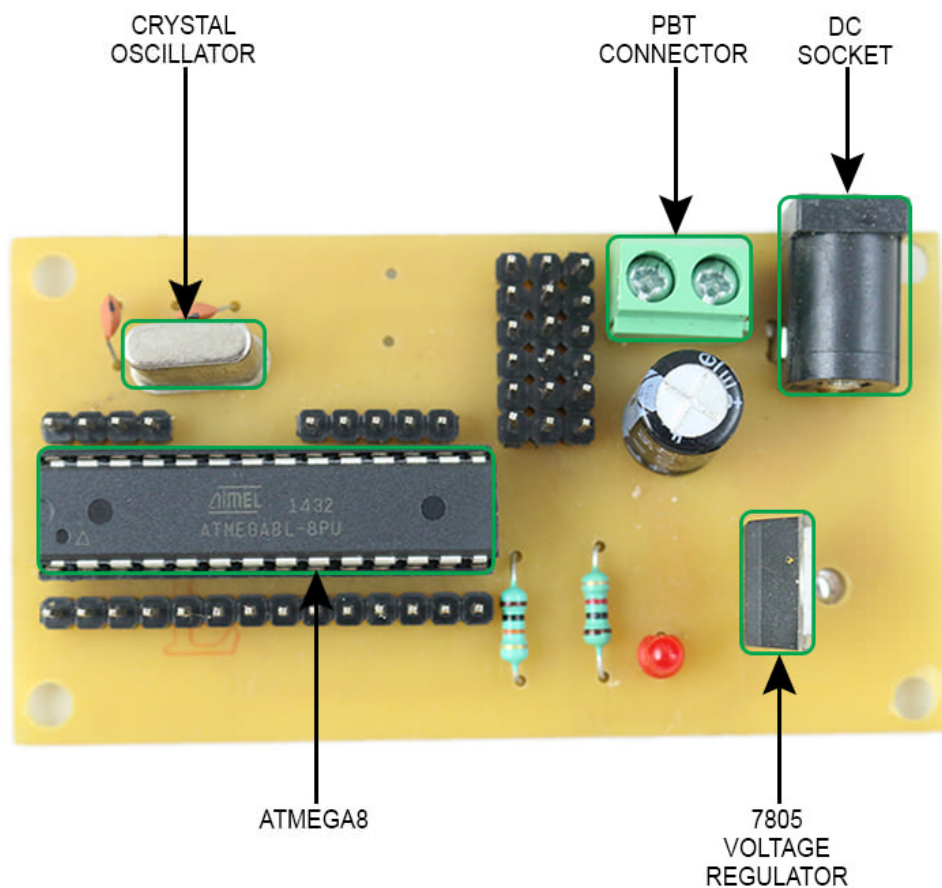

SKU : RM0592

ALL THE PRODUCT MAY BE COVERED FROM ROBO MART.COM Copyrights by Robomart.com

DESCRIPTION

This is an atmega 8 project board without microcontroller specially used for the purpose of project designing.

Features of Atmega8 Project Board without Controller V2.0:

Copyrights by Robomart.com

- Onboard atmega 8 IC base.
- Onboard crystal oscillator.
- Onboard I/O peripheral pins.
- Onboard On board PBT connector.
- Onboard DC socket.
- Onboard 7805 regulator IC.

Applications of Atmega8 Project Board without Controller V2.0:

- Password based door lock system.
- PWM generations (for Servos).
- Programmable Watchdog Timer.
- Line following Robot.
- Obstacle Avoiding Robot.
- Light Searching Robot.
- Edge Avoiding Robot.
- Cell phone Controlled robot (DTMF Based).
- And many more..
