

PRODUCT NAME : 8051 Microcontroller
Development Board

PRICE : Rs 1,600.00

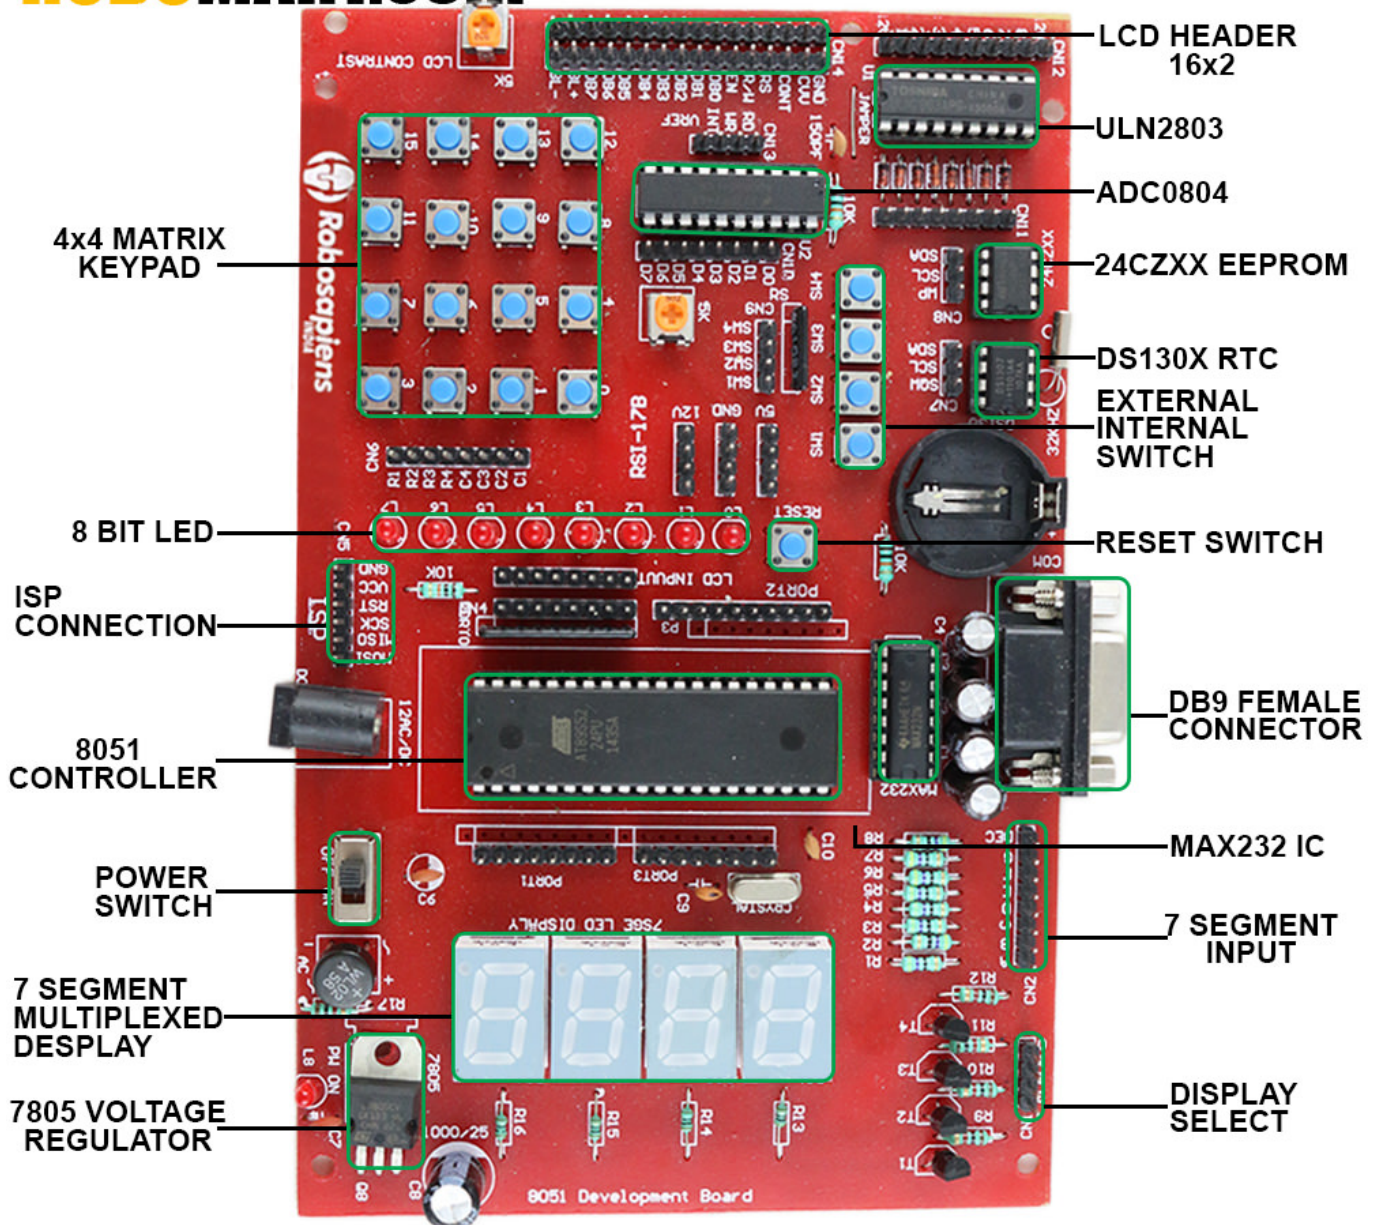

SKU : RM0624

DESCRIPTION

NOTE: THIS PRODUCT MAY BE DIFFERENT FROM IMAGE SHOWN ABOVE. Copyrights by Robomart.com

The 8051 Development Board kit is based on our 40 pin development board which is compatible with other Atmel AT89Sxx microcontrollers. This kit is an easy and low cost way to get started with microcontrollers.

Features of 8051 Microcontroller Development Board:

- Onboard 3 way power supply.
- Onboard 7805 voltage regulator IC.
- Onboard 7 Segment multiplexed display.
- Onboard Power switch.
- Onboard ISP connection.
- Onboard 8 bit LED.
- Onboard 4x4 matrix keypad.
- Onboard LCD header (16x2).
- Onboard ULN 2803 driver IC.
- Onboard ADC0804 IC Base.
- Onboard 24CZXX EEPROM.
- Onboard DS130X RTC IC Base.

- Onboard external & internal switch.
- Onboard Reset switch.
- Onboard CMOS battery clamp.
- Onboard DB9 female connector.
- Onboard MAX232 IC.
- Onboard 7 segment input.
- Onboard display select pin.

Application of 8051 Microcontroller Development Board:

- Robotics project.
- Electrical/Electronic projects.
- And many more..

Kit Contents:

- 1 x 8051 Board
- 1 x usb Programmer
- 1 x 8 Pin Female to Female Jumper Wire.
- 1 x 4 Pin Female to Female Jumper Wire.
