

PRODUCT NAME : VNT6656 USB Wireless
Network Cards Module(Inbuilt W
ifi)

PRICE : Rs 2,000.00
SKU : RM0668

DESCRIPTION

This **single-chip 802.11a/b/g WLAN controller** enables high-speed 54Mbps wireless connections to satisfy the increasing bandwidth needs of the most demanding enterprise, public access and home WLAN users. WLAN 802.11B/G embedded module enables high-speed 54Mbps wireless connections to LAN services.

Specifications of VNT6656 USB Wireless Network Cards Module:

- WLAN: IEEE 802.11b/g.
- Data Rate: Up to 54 M bps.
- Chip-set: VIA VT6656.

Features of VNT6656 USB Wireless Network Cards Module:

- Host interfaces:USB1.1/USB2.0.
- I2C EEPROM interface.
- Provide at least 4 GPIO.
- Integrated 3.3V to 1.8V regulator control circuit.
- Integrated RISC with internal ROM support.

- Smart power saving mechanism under USB1.1 connectivity.

Applications of VNT6656 USB Wireless Network Cards Module:

- It is used in wireless IP camera.
- Electrical/electronic projects.
- Wi-fi communication.
