

PRODUCT NAME : DTMF Module Version 1 for Arduino/Raspberry-Pi/Robotics

PRICE : Rs 180.00
SKU : RM0033

SEE THE PRODUCT PAGE FOR THE FULL DESCRIPTION Copyrights by Robomart.com

DESCRIPTION

The DTMF module is a HT 9170 decoder IC which converting from 16 bit DTMF signal into 4 bit binary data according to the keypad pressing and this data can understanding by the microcontroller.

Features of DTMF Module Version 1

- Decodes DTMF as 4 bit binary.
- TTL level output for direct connection to microcontrollers.
- Low power 5V DC operation.
- LED indication of outputs.
- Simple to use.
- Based on excellent HT9170B IC.

Applications of DTMF Module Version 1

- Mobile controlled robot.
- Remote Control systems.
- Mobile based Home appliances controlled.
- Caller ID applications.
- FM receiver based remote control.
- Remote control using Mobile phone.

Kit Content of DDTMF Module Version 1

- DTMF Module Version 1 For Arduino/Raspberry-Pi/Robotics.
- AUX Wire.
- 6 X (Single Wire Jumper Cable).
