DESCRIPTION

The RF transceiver is a 4 channel wireless device which is the pair of two modules - a transmitter and a receiver. Together they make an addressable wireless system that can range up to 65 meters. The RF Modules used is compatible to HT12D / 12E Encoder/Decoder ic.

Features of 434 MHz 4 Channel RF Wireless Robotic Board V2.

- Decodes DTMF as 4 bit binary.
- TTL level output for direct connection to microcontrollers.
- Low power 5V DC operation.
- LED indication of outputs.
- Simple to use.
- Based on excellent HT9170B IC.

Applications of 434 MHz 4 Channel RF Wireless Robotic Board V2 .

- Mobile controlled robot.
- Remote Control systems.
- Mobile based Home appliances controlled.
- Caller ID applications.
- FM receiver based remote control.
- Remote control using Mobile phone.

Kit Content of 434 MHz 4 Channel RF Wireless Robotic Board V2 .

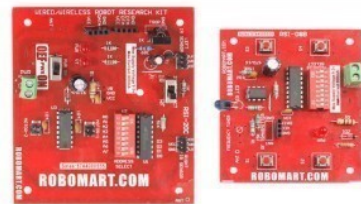

- AUX Wire.
- 6 X (Single Wire Jumper Cable).
- 4 Channel RF Board
