

**PRODUCT NAME :** Robosapiens ATMEGA8  
IBOT V1.0 Robotic Kits

**PRICE :** Rs 2,350.00

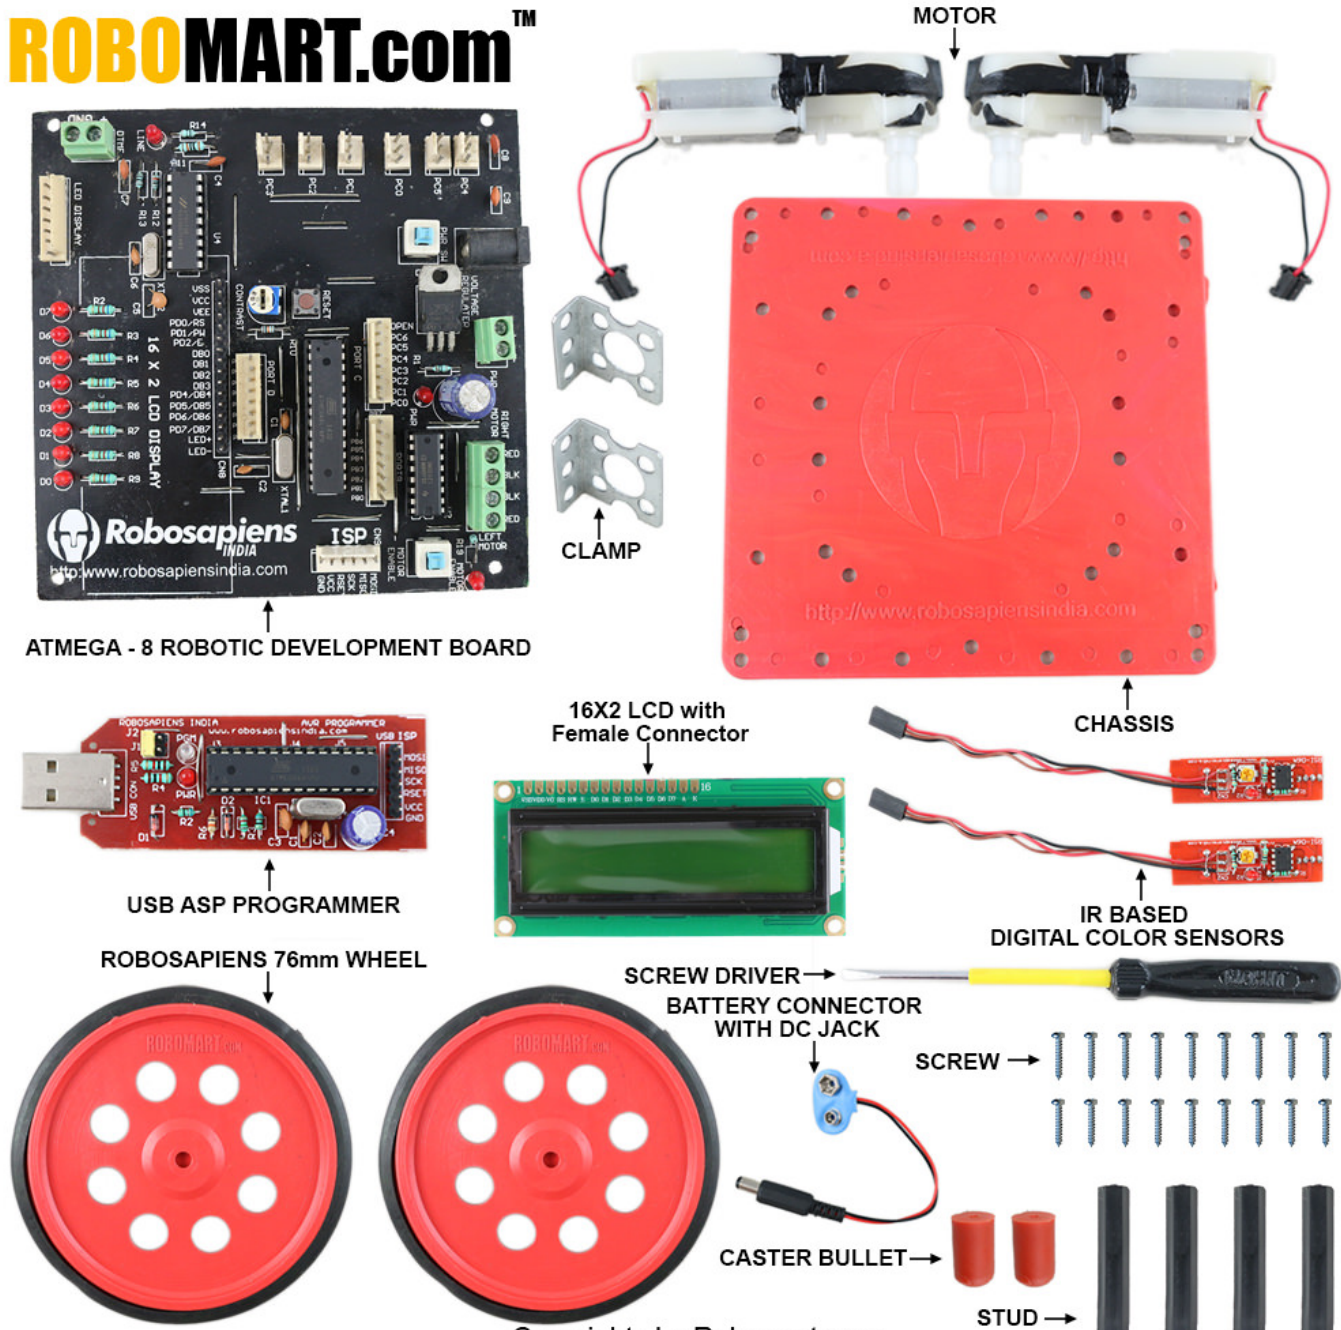

**SKU :** RM0829

## **DESCRIPTION**

The Atmega8 IBOT is a multipurpose robotics kit. It's multipurpose and very durable nature helps in acquiring expertise on basics of robotics and in embedded system field for making expert to you. This kit is best suited for hobbyists and Engineering / Diploma Projects.

## Features of ATMEGA8 IBOT V1.0:

- High-performance, Low-power Atmel® AVR® 8-bit Microcontroller.
- Multiple Berg connectors for developing multiple applications.
- Operating Voltage: 5v to 25 v.
- Operating Current: 100 ma to 1000 ma.

## Applications of ATMEGA8 IBOT V1.0:

- DIY projects.
- Electrical/Electronic projects.
- Robotic projects.

## Kit Contents of ATMEGA8 IBOT V1.0:

- 1x (Atmega -8 Robotic Development Board).
- 1x (ATmega8).
- 1x (Chassis Board V 3.0).
- 1x (16X2 LCD with Female Connector).
- 1x (USB ASP programmer).
- 2x (IR Based Digital Sensors).
- 2x (Caster bullets).
- 1 Pair 76mm Wheel.
- 1 Pair Plastic gear DC motors.
- 1x (Screw driver).
- Other required Tools and accessories etc..
- 1 Nos 8 Wire Jumper Cable.
