DESCRIPTION

This is a great combination of quad frame, BLDC motors, ESCs and propellers, kk multi copter control board V 5.5 with USB Programmer to help you quickly build your own quadcopter. Quadcopter 49.5cm Diameter Frame is a sturdy yet light weight frame which is capable of surviving repeated crashes. This quad rotor gives maximum thrust of 3.6Kgs while it weights around 1.2 Kg. The ESC included in the package can drive motors with continuous 30Amp load current. This ESC is factory programmed and ready to use.

Features of Quadcopter Mega DIY kit with KK multi copter control board:

- Tried and tested combination of frame, motors, esc, propellers, flight controller, radio, etc.
- Gyro + Accelerometer + Magnetometer IMU for full control, On-board data flash for logging.
- Flight time up to 15 minutes.
- Fully assembled and tuned - requires about 8 hours assembling, configuring and tuning from kit.

Applications of Quadcopter Mega DIY kit with KK multi copter control board:

- DIY Quadcopter projects.
- Quadrotor (quadcopter).
- Electrical/Electronic quad-copter projects.
